

Sungrow AC007UK-01

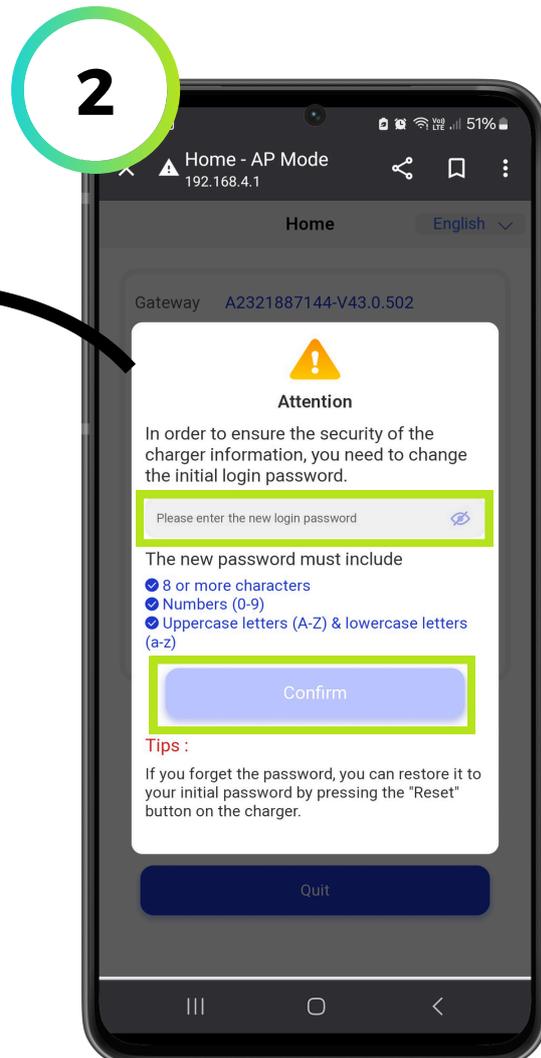

Cleenergy EV Platform Onboarding Guide

- **Please Note:** The **Sungrow AC007UK-01** charge point is configured via its **Wi-Fi hotspot** which is active for 15 minutes after powering up.
- **Select the hotspot on your device** (identified by the charge point serial number) and **use the password admin123** to connect.

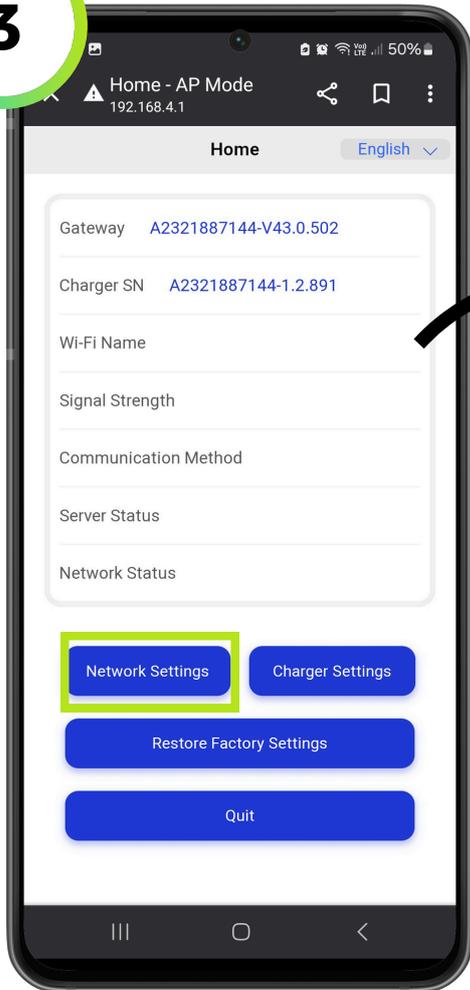

1. Enter 192.168.4.1 into the web browser on your device to navigate to the Sungrow web portal. Enter the 4 digit code located on the RFID cards that are supplied with the charger and select Login.

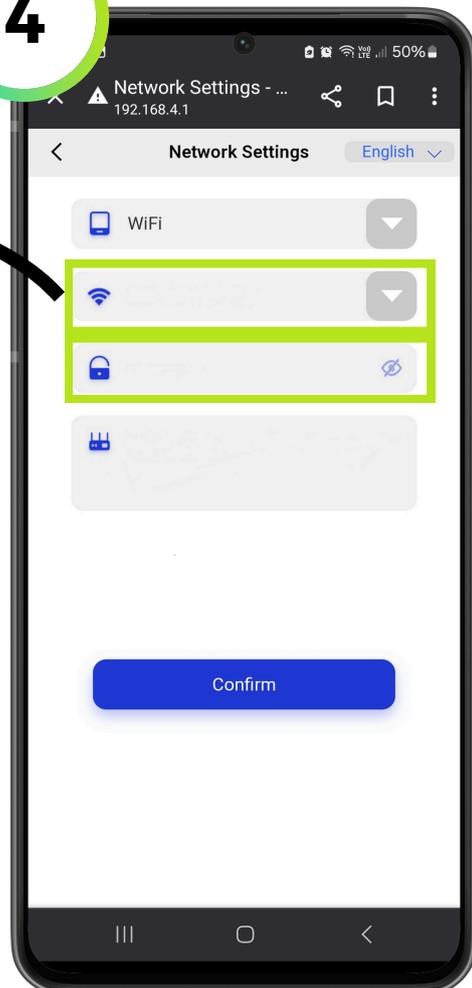

2. Create a new password using the parameters described, then select Confirm. You will then return to the login page and be required to enter your newly-created password to enter the web portal.

3

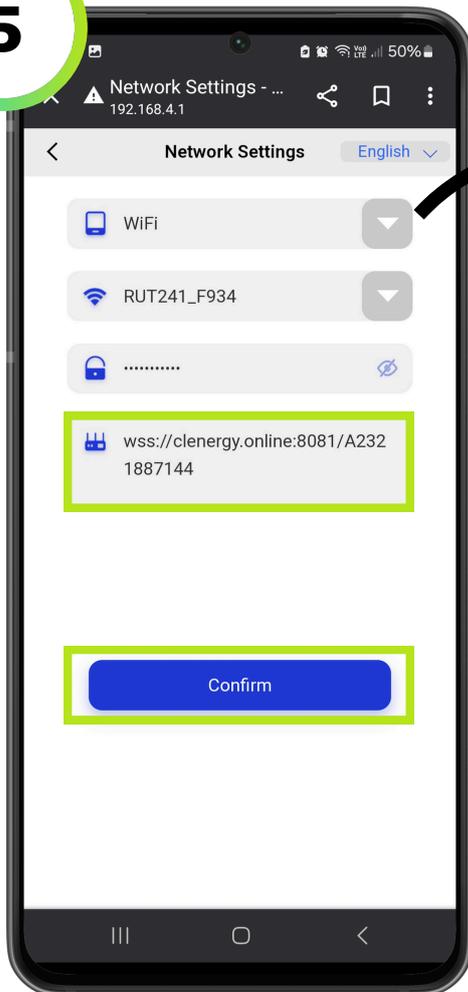

3. On the home screen, select **Network settings**.

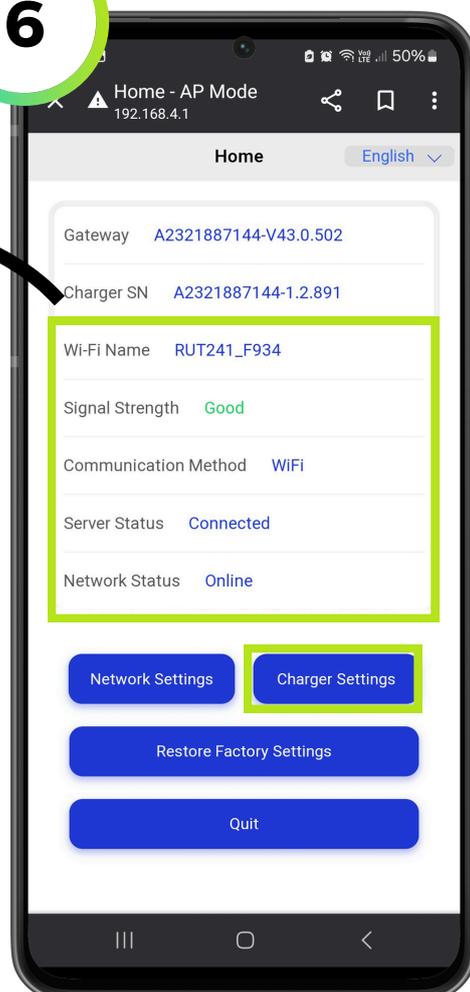

4

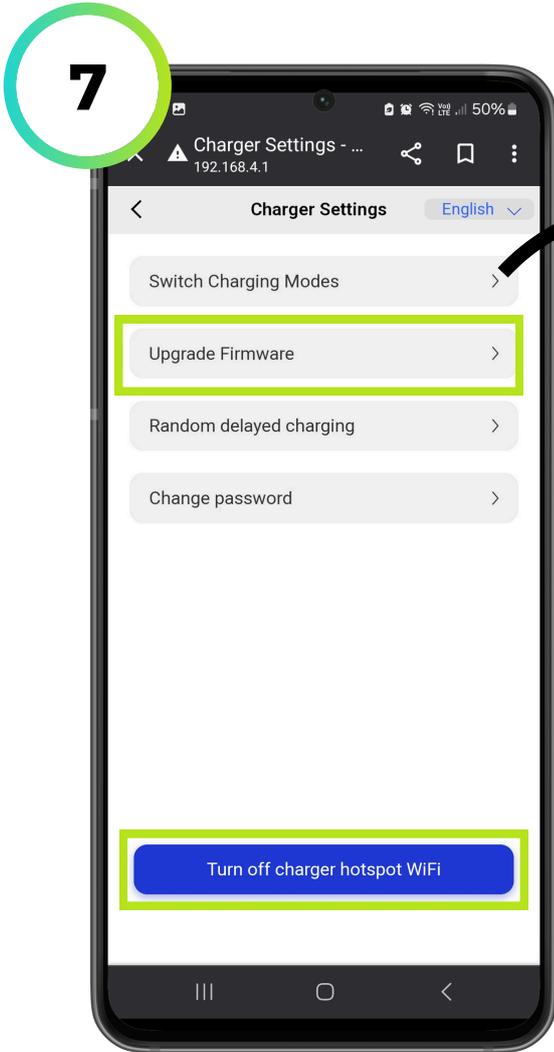

4. Select your **Wi-Fi network** from the drop-down menu and enter the relevant credentials to connect to the charge point.

5

5. Enter `wss://clenergy.online:8081` into the highlighted field. The URL should automatically add the serial number and display itself as shown. Select **Confirm** and the charger will reboot. **Login to the portal** again once the charge point hotspot becomes available.

6

6. Ensure that the charge point has retained its network connection then select **Charger Settings**.

7. Select **Upgrade Firmware** if required and complete this process using the manufacturers instructions. Once completed or if no update is required, **close the charge point hotspot and the app** to complete the onboarding process.
